ARGOS®

MEASURING IN A BLINK

CEMB

5 Measure toe and camber in less than 5 seconds

Reduce time for measurement

INSTANT TOUCHLESS MEASUREMENT ON THE 4 WHEELS WITHOUT EXITING THE VEHICLE

- No clamps, targets or sensors
- No manual adjustments for cars with different wheelbases
- Rim run-out not compulsory
- No need to remove hubcaps
- Measuring process automatically starts at the arrival of the vehicle
- Measure toe and camber in less than 5 seconds and all data in a few more
- No brake pedal required to measure caster
- Automatic locking and unlocking turntables
- Remote vehicle specs selection

OUTSTANDING PRACTICALITY

- Automatic detection of the ongoing procedures
- Remote software control and measurements visualization
- Automatic pre-selection of vehicles' specifications
- Camera support for the positioning of the vehicle on the turntables
- No leveled lift required

FITS AROUND YOUR WORKING SPACE WITHOUT INTERFERENCE

- Fitting to every type of lift for wheel alignment or pit
- No obstructions around lift or wheels
- No moving parts, no bulky cabinet

INCREASE YOUR BUSINESS BY SAVING TIME

- Eliminate any effort and time for aligner's measurements
- Thorough check all your customers' vehicles
- Find out more vehicles that need adjustments
- Increase turnover and customers' satisfaction
- Provide customers a clear overview of vehicle status through the Audit report
